

ABSTRACT OF THE DISCLOSURE

INS
a1

A paper product (1), such as a greeting card, comprises two paper surfaces (2,3) glued to one another by means of an adhesive. Between said paper surfaces (2,3) at least one germinable seed-corn is arranged. According to the invention said germinable seed-corn is located in the area of a section (4). Said section (4) is separable from the paper product along a perforation (5).
